

DATA SHEET

3Com® Wireless 7760 11a/b/g PoE Access Point

Secure and reliable, 108 Mbps wireless connectivity with PoE, for small to medium businesses. This innovative access point provides advanced security features including WPA2, AES support for multiple SSIDs, VLANs and Rogue AP detection making it a true enterprise-class solution.

OVERVIEW

The 3Com® Wireless 7760 11a/b/g PoE Access Point is a cost-effective dual band, Power over Ethernet (PoE) wireless solution for small and medium enterprises. Configurable, this access point can operate at IEEE 802.11a or can be used as an IEEE 802.11b/g access point.

With the latest advanced security features such as Wi-Fi Protected Access (WPA/WPA2), Wired Equivalent Privacy (WEP) and Open system this access point (AP) provides ultra-fast speeds of up to 108 Mbps in turbo mode and offers superior long-range connectivity with eXtended range (XR) technology. This new access point also provides multiple SSID support and VPN passthrough along with VLAN support.

KEY BENEFITS

ENABLE WIRELESS FREEDOM

Take advantage of the freedom of high-speed networking without wires with this Wi-Fi CERTIFIED 3Com Wireless 7760 11a/b/g PoE Access Point. WLANs are an attractive solution for cost-effectively and securely extending mobile access to wired network resources and for creating full-featured networks in small to medium businesses, remote sites or at temporary locations. Each access point supports up to 64 wireless users, allowing plenty of room for growth.

PROVIDE POE DEPLOYMENT FLEXIBILITY

PoE support makes it easier than ever to overcome installation problems by eliminating the need for an AC power plug at each AP. The 3Com Baseline Switch 2924-PWR Plus or other 802.3af-compliant PoE products supply both power and data to the access points through Category 5 or 6 Ethernet cable, giving you flexible installation options in hard-to-wire or -reach locations.

KEY BENEFITS (CONTINUED)

SECURE AND PROTECT WIRELESS COMMUNICATIONS

3Com delivers enterprise-class security features to small and medium businesses. To shield wireless communications at the source, WPA2 with TKIP/AES encryption provides the latest, toughest standards-based security—WEP encryption supports legacy 802.11b wireless clients. For additional protection, this access point supports IEEE 802.1X and MAC address access control, authentication, and authorization through backend RADIUS servers.

PROVIDE FLEXIBLE SECURITY AND ACCESS CONTROL

You can configure and store up to four SSIDs with different security profiles for groups of users. IEEE 802.1Q-compliant VLAN support works with the multiple SSID feature to control access to network resources and segment user traffic.

SOLVE COMPLEX CONNECTIVITY PROBLEMS

The Wireless Distribution System bridging feature solves complex wireless connectivity problems. The access point supports both point-to-point and point-to-multipoint WDS links as well as repeater and client bridge modes for flexible network deployment.

DELIVER ENTERPRISE-CLASS FEATURES

3Com delivers superior business value by offering enterprise-class solutions without the complexity. 3Com also backs each product with global sales, service and support along with technology, financial and operational strength.

FEATURES AND BENEFITS

FLEXIBLE HIGH-SPEED CONNECTIVITY

Configurable radio support	Supports and offers IEEE 802.11a or IEEE 802.11b/g.
High-speed access	802.11a and 802.11b/g standard supports speeds up to 108 Mbps in SuperG mode.
Wi-Fi a/b/g CERTIFIED	Helps ensure interoperability with Wi-Fi CERTIFIED products from other vendors.

ROBUST SECURITY FEATURES

Encryption: WPA/WPA2, AES, TKIP and WEP	Toughest industry-standard algorithms help keep wireless transmissions private.
Multiple security profiles	Store up to eight different security settings; up to four security profiles can run at any time.
Multiple SSID support with SSID isolation	SSIDs can be bridged together or isolated.
Access control	Screens device MAC addresses to ensure that only trusted clients gain access to the WLAN.
802.1Q VLAN support	Groups users according to data or traffic requirements to segment traffic flow based on business priorities.
RADIUS server MAC-based and 802.1X AAA support	Centralizes wireless security through existing network RADIUS servers.
Rogue AP detection and logging	Identifies and logs unauthorized, potentially harmful APs for remedial action.

FEATURES AND BENEFITS (CONTINUED)

INSTALLATION AND MANAGEMENT CONVENIENCE

WDS bridge and repeater configuration	Multiple APs can function as bridges supporting point-to-point or multi-point modes; repeater mode extends wireless coverage.
PoE support	Expands installation options by eliminating the need for power adapters and AC outlets for APs.
Access Point Discovery program	Automatically discovers AP devices to simplify configuration and management (PCs with Windows-based operating systems only).
SNMP support	Enables the AP to be centrally managed by popular standards-based network management applications.
Auto configuration	Copies settings from compatible APs on the WLAN, simplifying and speeding setup.
SNMP support	Enables the AP to be centrally managed by popular standards-based network management applications such as SNMP v1 and v2c.
Syslog support	Enables the AP to be centrally monitored by sending data to the network Syslog server.
Web browser-based administration	Familiar browser interface lets you configure and manage APs from anywhere on the network.
Auto firmware update	Automatically checks an FTP server for available firmware updates.

PoE Support

Choose from several power options to match your installation needs. First, the PoE access point can be powered with the supplied PoE adapter.

You can also power the access point using an 802.3af-compliant PoE switch. The switch provides both data and power through the Ethernet cable.

The mid-span solution distributes power to the PoE access point over existing switch connections, seamlessly extending network connectivity into hard-to-wire locations.

Multiple SSID Support

Multiple SSID support enables many flexible configurations, including simultaneous multiple client security schemes. You no longer need to dumb down your wireless network to support a few legacy WEP devices.

Multiple SSID and VLAN Support

With the 3Com Wireless 7760 11a/b/g PoE Access Point, a single Ethernet link supports multiple VLAN traffic tunnels.

Point-to-Point WDS Link

With the 3Com Wireless 7760 11a/b/g PoE Access Point, you can connect wired LANs with a wireless WDS link. The APs act as wireless bridges, forwarding traffic between LANs.

Point-to-Multipoint WDS Link

The 3Com Wireless 7760 11a/b/g PoE Access Point can function as a wireless bridge in either point-to-point (PTP) or point-to-multipoint (PTMP) modes for installation flexibility.

Wireless Repeater Mode

The 3Com Wireless 7760 11a/b/g PoE Access Point can also extend the range of WLANs by acting as a wireless repeater, forwarding traffic between associated wireless workstations and another AP connected to the wired LAN.

Client Bridge Mode

The 3Com Wireless 7760 11a/b/g PoE Access Point can transform an Ethernet device into a wireless device to expand connectivity options.

SPECIFICATIONS

MINIMUM SYSTEM REQUIREMENTS	Computer with an Ethernet 10BASE-T, 10/100, or 10/100/1000 interface configured for Internet communication Operating system that supports an Ethernet connection with an IP stack (Installation CD Discovery Application requires Windows XP, 2000 or Vista)	802.11b/g 1–11 Mbps: $\geq +18$ dBm 12 Mbps: $\geq +18$ dBm 18 Mbps: $\geq +18$ dBm 24 Mbps: $\geq +18$ dBm 36 Mbps: $\geq +18$ dBm 48 Mbps: $\geq +16$ dBm 54 Mbps: $\geq +16$ dBm
MEDIA INTERFACES	RJ-45, IEEE 802.11a, 802.11b, 802.11g One 10BASE-T/100BASE-TX IEEE 802.3af-compatible PoE port with auto-negotiation	RECEIVE SENSITIVITY 802.11a 6 Mbps: ≤ -87 dBm 9 Mbps: ≤ -86 dBm 12 Mbps: ≤ -84 dBm 18 Mbps: ≤ -82 dBm 24 Mbps: ≤ -79 dBm 36 Mbps: ≤ -75 dBm 48 Mbps: ≤ -72 dBm 54 Mbps: ≤ -71 dBm
DATA RATES	802.11g/a: 54, 48, 36, 24, 18, 12, 9, 6 Mbps with automatic fallback 802.11b: 11, 5.5, 2, 1 Mbps with automatic fallback	802.11b/g 1 Mbps: ≤ -95 dBm 2 Mbps: ≤ -92 dBm 5.5 Mbps: ≤ -91 dBm 6 Mbps: ≤ -89 dBm 9 Mbps: ≤ -88 dBm 11 Mbps: ≤ -88 dBm 12 Mbps: ≤ -86 dBm 18 Mbps: ≤ -84 dBm 24 Mbps: ≤ -81 dBm 36 Mbps: ≤ -77 dBm 48 Mbps: ≤ -73 dBm 54 Mbps: ≤ -72 dBm
FREQUENCY BAND	802.11a: 5 GHz; 802.11b/g: 2.4 GHz	STANDARDS CONFORMANCE IEEE 802.11a, 802.11b, 802.11g, 802.11i, 802.3, 802.3af, 802.1X; WEP, AES, WPA, WPA2, WMM, and Wi-Fi CERTIFIED
WIRELESS TRANSMIT POWER	18 dBm	ANTENNA 2 removable 2dB gain antennas with R-SMA connector
USERS SUPPORTED	Up to 64 simultaneous 802.11b/g wireless users for optimal throughput	SECURITY WPA2 AES and TKIP encryption; 64/128/152-bit WEP encryption; 802.1X with EAP-TLS, EAP-TTLS, and PEAP; WPA-PSK authentication; MAC address authentication and filtering; 802.1Q VLAN; multiple SSID; RADIUS client authentication, authorization, and accounting
OPERATING RANGE	802.11a: up to 50 meters (164 feet) transmit and receive 802.11b/g: up to 100 meters (328 feet) transmit and receive Unobstructed range maximum: 457 meters (1,499 feet)	NETWORKING PROTOCOLS TCP/IP, Bridging Protocol, DHCP, HTTP, FTP
OPERATING CHANNELS:	Channel availability depends on local country regulations. Wireless LAN system administrator must choose correct country of operation. Channels are then automatically configured to comply with specified country's regulations.	PERFORMANCE Dynamic rate shifting Packet bursting Clear channel connect 802.11a/b/g SuperG mode
MODULATION TECHNIQUE	DSSS (Direct Sequence Spread Spectrum) OFDM (Orthogonal Frequency Division Multiplexing)	MANAGEMENT SNMP v1 and v2c support Remote management with Web browser over HTTP; command line interface over Telnet
MEDIA ACCESS PROTOCOL	CSMA/CA	LEDs Power, 10/100 Mbps, 802.11a, 11b, or 11g activity
POWER CONSUMPTION	6W maximum (from PoE port)	POWER SUPPLY PoE adapter: 48VDC, 400 ma
TRANSMIT POWER SETTINGS	Based on the regulatory domain set by the system administrator, not to exceed the following: 802.11a 6 Mbps: $\geq +18$ dBm 9 Mbps: $\geq +18$ dBm 12 Mbps: $\geq +18$ dBm 18 Mbps: $\geq +18$ dBm 24 Mbps: $\geq +18$ dBm 36 Mbps: $\geq +18$ dBm 48 Mbps: $\geq +16$ dBm 54 Mbps: $\geq +16$ dBm

PACKAGE CONTENTS

3Com Wireless 7760 11a/b/g PoE Access Point
Two external dual-band 2.4/5.15GHz antennas with R-SMA connectors
Mounting hardware
PoE injector
Quick Installation Guide
Support and Safety sheet
Warranty sheet
CD-Rom with drivers and documentation

WARRANTY AND OTHER SERVICES

Three-year Hardware Warranty.
Limited Software Warranty for 90 days
Advance Hardware Replacement with Next Business Day shipment in most regions.
90 days of telephone technical support
Refer to www.3com.com/warranty for details.
